Create Play Value

SOFT MODULAR PLAY

Soft modular play is often installed in the recreational play zones and commercial centers and any business that wants to attract families and kids. Soft play system is designed to provide toddlers and kids with not only amusement and fun, but also knowledge and social skills.

Hundreds of playing elements are available in our indoor playgrounds, such as slides (wave slide, donut slide, tube slide, drop slide, spiral slide), ball pit, fun ball battle (ball blaster), trampolines, spider tower, bridge, web crawl, tube crawl, various obstacles and so on. These play attractions are good enough to generate high play value to your play centers and well able to main kids' interest for a long time and get you repeat business.

Our talented designers are very creative and good at making any design or theme. It's a great thing that you have one-of-a-kind theme for your play center.

Standard, fully custom, or a mixture of both types of indoor playground equipment are all available. No matter you have a small or big budget, our budget-conscious designers are always capable of designing your soft play structure in a professional and economic way.

We're committed to providing an unforgettable, safe and fun experience where kids can stay active and use their imagination as they play and explore. Safety is our number one priority. Our certified safety inspectors ensure that each of our play attraction adheres to rigorous international safety standards.

All of our designs comply with, meet, or exceed EN1176-77, ASTM 1918-12, GB/T 34272 and AS3533.4.2 standards for contained playground equipment for Europe, United States, China and Australia respectively. For United States, they are ASTM and ADA compliant for international installations where applicable.
As indoor playground equipment manufacturer, we don't stop at soft playground design, we also handle the manufacturing, shipping, and installation of your playgrounds—which means you'll receive a turn-key solution from us and run your business in a worry-free way.

TRAMPOLINE PARK

A trampoline park typically has many different trampolines that are placed together to create a large area for people to enjoy. People use the trampolines for jumping, racing and new ways of playing traditional games such as basketball and dodgeball.

TRAMPOLINE PARK

01 Free Jump

Let go of gravity, grab some air on wall-to-wall trampoline court and reach new heights;

02 Basketball trampoline

The average person can't dunk a basketball, but at here you can be above the rim, perform like a super NBA basketball star on basketball court.

03 Performance Trampoline

Experience a high-octane adrenaline rush. Gravity does not exist. A must for all parkour enthusiasts.

04 Dodgeball trampoline

Bound and rebound between the trampoline floor and the trampoline walls. Give your body a new freedom of movement, in this game you see the players rushing, throwing and catching the ball, diving, ducking and jumping to eliminate opposing players. Get ready for an experience like no other.

05 Interactive Trampoline

Interactive trampoline turns a normal trampoline park into a game scene. Every movement of players will be caught by infrered sensor and immediate reflection will show on the screen. Dozens of games are available and can be upgraded.

06 Gymnastic tumble track

Practice cheerleading and tumbling in a safe, and easy to land, environment! Users can flip, cartwheel, and show off all gymnastics skills.

07 Battle beam

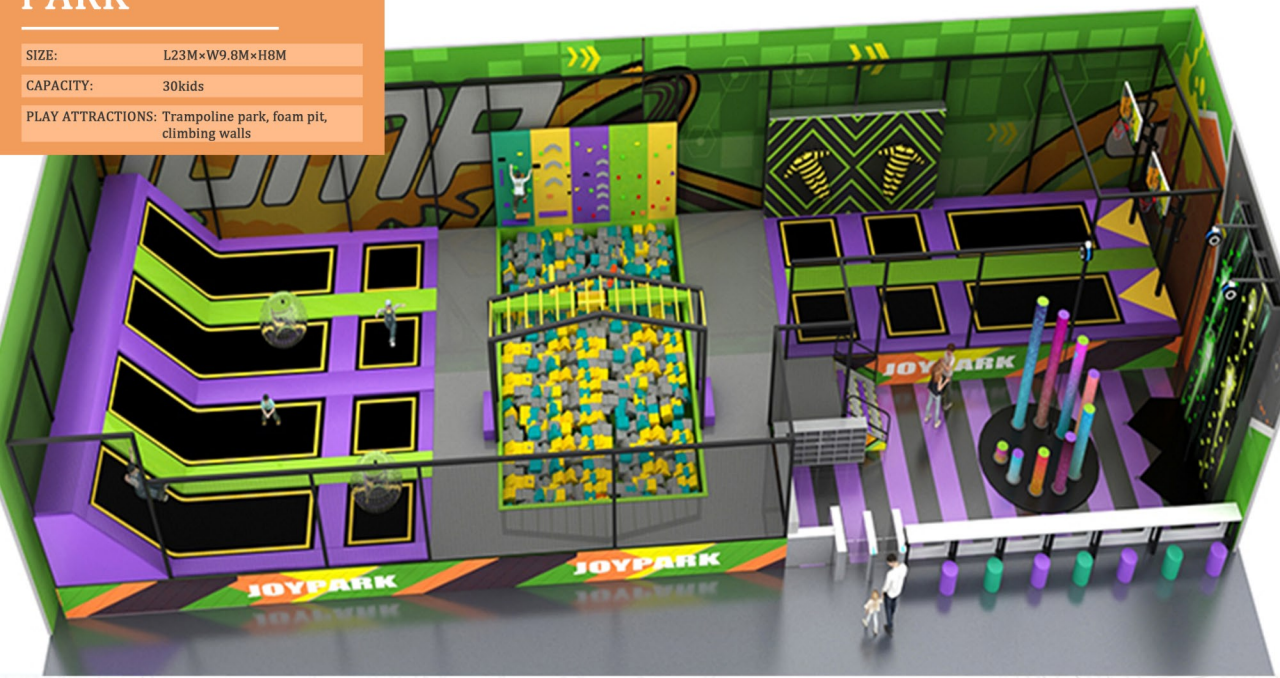

Challenge users to a gladiator-style dual on it. Be the first contestant to knock your competition into the foam pit to reign as champion.

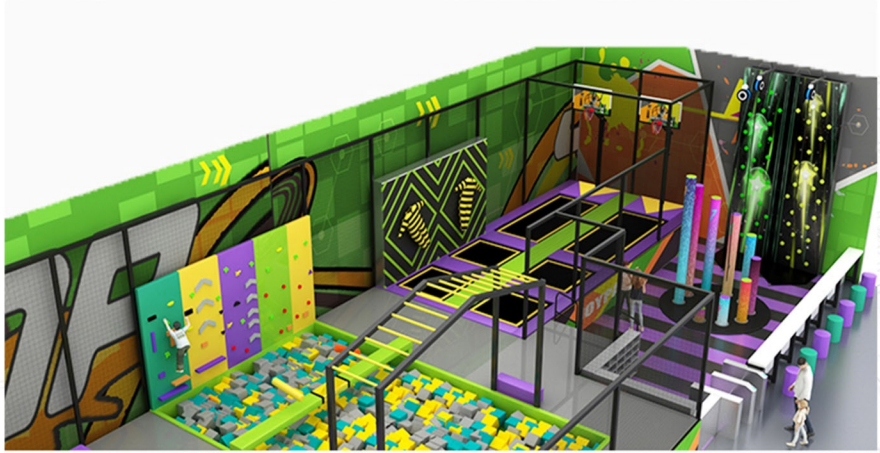

08 Foam pit

Take a dive into giant Foam Pit off of Jump Platform! This massive pit, filled with around 15,000 foam cubes, protects users in the best possible way.

ROPES COURSE

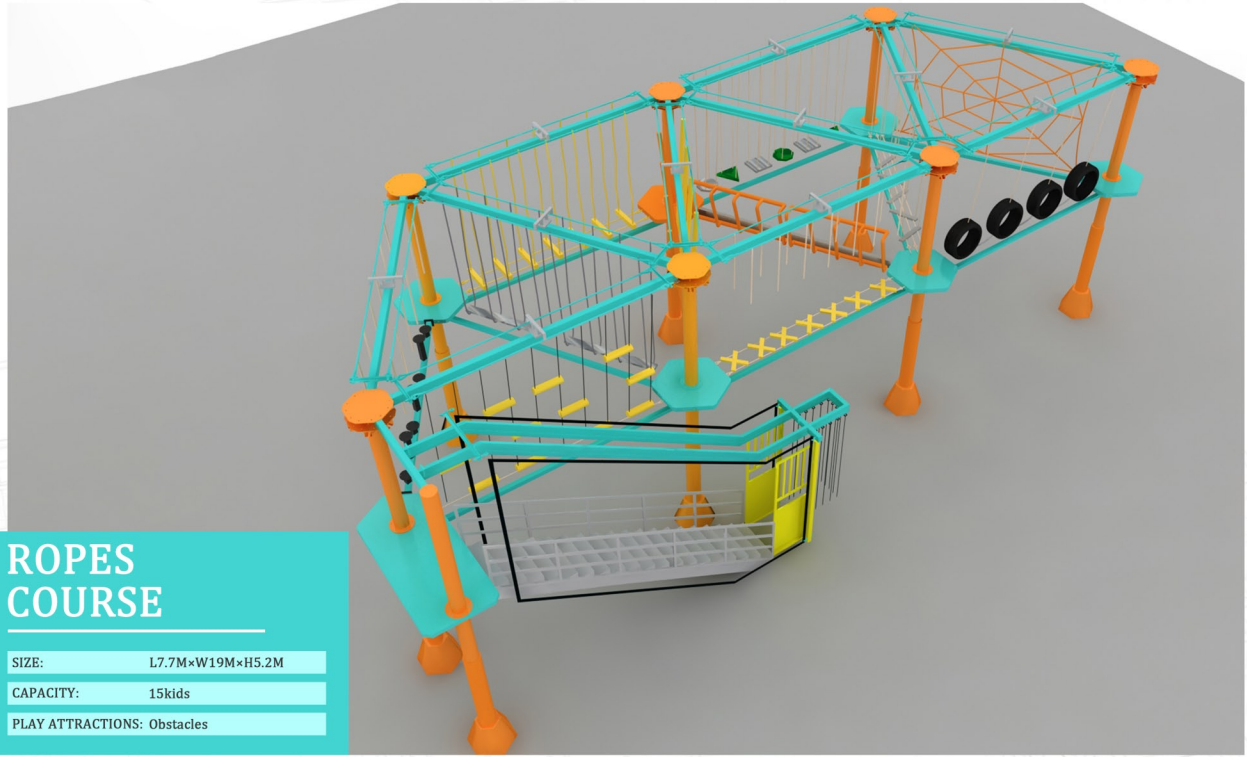

A ropes course is a type of play attraction that is often used by the general public as a form of fun and adventure in team-building activities but may also have physical components as well. Generally, the goal of a ropes course is to encourage participants to cooperate, collectively solve problems, and face fears. The ropes course consists of a series of real and imaginary obstacles dxesigned to challenge groups and individuals to work together in order to accomplish a given task.

The benefits of ropes course include increasing motivation, boosting confidence, improving the ability to solve problems, facing and overcoming fears, planning to reach an outcome and celebrating small milestones.

CLIMBING WALL

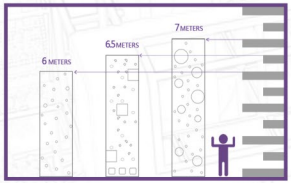

Climbing walls are mainly designed for kids for recreational training purpose. They are more often than not used for indoor climbing and also sometimes for outdoor climbing. They are designed and made under the guidance of experienced designers and deft professionals.

Both children and adults can be engaged in the challenge of climbing and the fun of play. Colorful and dynamic, our fun walls for kids bring users to a world of climbable skyscraper, African forest, book house, deep space and many more. Climbing walls provide additional revenue stream like birthday celebration packages, team-buildings, corporate kids parties and other.

Provided climbing walls for kids have gained great popularities in market due to their nice patterns and colors, excellent tensile strength, smooth finish and rugged construction.

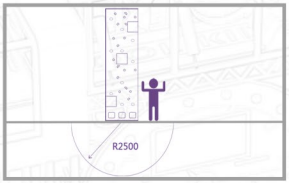

As climbing wall supplier, we also offer our clients worldwide customized options in terms of patterns, colors, height, width and even materials at reasonable market prices.

CLIMBING PILE

NINJA WARRIOR

All Obstacles are devised to ensure maximum strength, produce flexibility, develop skills, and safety. Ninja Warriors need first and foremost a lot of upper body strength and endurance, explosiveness, and great grip strength.
Participants with good skills and strength concentrate on becoming like a monkey that can swing from branch to branch. Obstacles of increasing difficulty cater for a wide age range of users, from children to adults.
Ninja warrior usually comes with strong frame to support these obstacles. The frame can be made from either aluminum or box steel.
